Please note that we will not remove anything or change at this time on Facebook. I made a decision and sent an email to Facebook.

We must work very quickly to implement a solution and also implement our new standard to create the best possible experience.

Dear Joseph,

I am writing to follow up to our discussions regarding Power.com's integration of Facebook connect, your requests for us to take down our current Power browser compatability with Facebook, and your complaints regarding our users storing their Facebook login information inside the Power Browser. I hope you will pass this letter on to Sam and other appropriate parties inside of Facebook to communicate our sincere desire to diplomatically resolve our current disagreement and help you reduce these disagreements with well intentioned companies like Power.

Power.com is very committed to working with Facebook and we sincerely hope that this message of diplomacy and good intention is very clear in this letter. We would like to reiterate that we have made the decision to make every diplomatic effort possible to cooperate with Facebook to integrate your Facebook Connect solution on our login page. We had originally expected that it would take us 2 weeks to complete this integration, but with the holidays and the amount of work necessary to complete this integration, we realistically don't expect have this new solution fully integrated until January 30<sup>th</sup>. After careful consideration and after previously thinking that it would better to take Facebook comptability down while we implemented this new solution, we have made the business decision to not prevent the interruption of service to our millions of users while working closely to make these changes to address Facebook's concerns. We sincerely hope that while this is not your desired action, you will respect our reasons for doing this and keep the door open and approve Power.com inside of Facebook connect when we go live in one month. Furthermore, we would like to work with Facebook to offer our complete browser tools to users with Facebook's consent and input into the user experience.

The Power.com browser provides our users value added features across their Internet experience. Like most browsers, we have little interest to cause harm to Facebook or reduce Facebook's revenues. On the contrary, we are taking proactive steps to pass all Facebook ads through to the user inside our browser. Similar to Firefox, Internet Explorer, Flock, and other browsers and browser add-ons, we provide our users a browser to

navigate and continue to use their existing sites and do not in any way attempt to obstruct users from using the sites they are accustomed to using every day. Like most browsers, we do offer our users the option to either start their experience on our home page or start on their default social network.

Furthermore, we are about to launch a new solution which will pass Facebook ads inside of all Facebook content which is displayed outside of Facebook. This is something we can have ready by the end of January and which we can also enable for you to offer to other development partners whose only desire is to create positive applications for Facebook users. We are committed to working with the entire industry to responsibly create a borderless web where all parties interests are respected when widgets, apps, messages, and other content are distributed outside of Facebook or outside the host site of any other web publisher.

Power strives for complete transparency with our users by providing them explicit statements on our front page in two different places about the nature of our application, the fact that we are a value added browser with no endorsement by other sites, and we also require a user before using our service to read through and proactively accept our terms and conditions where we for the third time clarify the users consent and understanding that we are in no way affiliated with or endorsed by Facebook.

We completely understand Facebook's position to not begin any business discussions with Power.com until we have become compliant with Facebook requests. We request that you please reconsider this decision and enable us to meet with Facebook as early as possible to diplomatically resolve this issue in a way that will allow us to keep creating new applications for Facebook and also help Facebook better accommodate other innovators and application developers like Power.com who only want to enrich your user's experiences. We are working to implement this complete solution with Facebook's cooperation by January 30<sup>th</sup> and sincerely hope that you will not misinterpret this delay and our decision to not interrupt the user experience of our mutual users as our lack of desire to work together with Facebook.

If you maintain that you cannot facilitate a direct meeting, we will happily use our own contacts to start these discussions with Facebook, but it is difficult to start these discussions until after the holidays are over. We have no problem using our own contacts to get to the appropriate people at Facebook engaged in discussions in January to resolve this, but naturally prefer your assistance to speed things up.

We believe that it would be a serious strategic mistake to disrupt the experience of the millions of Power.com users while we are actively working to complete the integration of Facebook connect. We believe that this would create unnecessary attention and disruption among users, the media, and the industry around what we believe is a discussion that can be handled maturely and quietly between our companies.

I believe that Facebook understands the current challenges as Meebo and soon thousands of other sites that will connect to Facebook using open source technology solutions and other user driven solutions that are not endorsed by Facebook. We respect Facebook's objectives to create an open Internet which respects and protects users and enables developers to create new innovations to serve Facebook users. We think that it is important that we all diplomatically work together to achieve these goals for the best interests of users. The borderless web is inevitable and we all need to work together to define the best practices for this new and exciting Internet which Facebook has already played such a pivotal role in helping create over the past years.

Power.com is very interested in sitting down with Facebook to discuss together the future of the borderless internet and work to address all of Facebook's concerns. I am willing to fly to San Francisco as early as possible to proactively present our solutions or we are happy to wait until after January 30<sup>th</sup> when we complete our integration of Facebook connect on our initial login page.

We believe that that your number one concern of protecting a users username and password will be resolved by our implementation of Facebook connect or by Facebook using an extension to Facebook connect that we would like to present to you which would allow Power and other outside developers maximum flexibility to innovate on top of Facebook while keeping the users username and password locked securely and safely outside the reach of Power.com or any other developer. We are currently supporting and helping introduce a new industry wide solution that will ensure that sites like Power.com, Meebo, eBuddy, and thousands of others will never have access or store Facebook usernames and passwords, but still have the maximum flexibility to innovate new applications on top of Facebook and all other sites on the Internet. We all share similar investors and partners and we are all striving for the same objectives.

We believe that Facebook's second concern is the potential loss of revenues when Facebook content is accessed outside of Facebook. This coming month, Power.com will be introducing a solution which will pass all Facebook advertising through with your content that is displayed outside of Facebook. We are proceeding with this without being asked in order to further demonstrate our desire to diplomatically and responsibly address the issues of distributed content inside of mashed up websites. Power.com has no interest to interfere or to prevent Facebook from receiving revenue from all its content and will go out of its way to showcase to the industry how to responsibly solve this problem. We would welcome the opportunity to work with you to define these standards together with the leading sites on the web and introduce these standards together to the industry and inside of Facebook connect.

Finally, as a browser, most of our users experience is actually inside of Facebook and other destination sites and we do not in any way prevent users from viewing the entire

Facebook experience with all ads and revenues streams intact.

While we understand your current requests to take down the current Facebook compatibility with the Power Browser today, we strongly believe that it is a mistake to disrupt the user experience of our millions of users and create attention around our private discussions.

Unlike some other sites that you are dealing with that may truly be causing harm to Facebook, Power.com's only goal is to enable new applications which enhance Facebook's users experience inside your site.

Therefore, we diplomatically request that you please grant us an extension until January 30<sup>th</sup> to work to achieve compliance with Facebook's request and to have time to diplomatically sit down with Facebook to present solutions that will assist you in dealing with these core issues not only with Power.com, but with the hundreds of other well intentioned developers who are only looking to create new innovations for Facebook, but who do not yet have the flexibility from Facebook to support their innovations. The floodgates are about to open and we would love to work proactively to solve these challenges together.

We sincerely hope you respect our decision on this and look forward to building a healthy and diplomatic dialogue with Facebook to address your true concerns of protecting your users. And we apologize for the lack of clarity on our position until today and for any confusion we may have created from this lack of clarity. Facebook's initial strong reaction did catch us off guard and after careful consideration, we have crafted this letter to make clear our position and desire and commitment to work together.

Best Regards,

Steve Vachani

CEO, Power.com

Steve,

Não quero discutir mais nada. Por favor tome sua decisão e eu estarei cuidando para que a mesma aconteça.

Gostaria mesmo era tirar férias, e poder estar curtindo o reveillon com a Jade sem estar preocupado em como pagar as contas.

Atc,

Eric
